

# YOU'RE INVITED!

Friday, December 9 – FREE!

## CBEI Alumni Event: 2011 Lake Champlain and Tributary Flooding Impacts

Join us at St. Michael's College on Friday, December 9th from 5-7 p.m. for appetizers and a 45-minute program about how the spring floods and Tropical Storm Irene impacted Lake Champlain and its tributaries. Dr. Bill Howland, Program Manager for the Lake Champlain Basin Program, will share his aerial photos from both flood events and discuss the impacts that the storms may have had on Lake Champlain. You'll be amazed at how the sediment plumes from both New York and Vermont rivers converged in the middle of Lake Champlain. **Win a door prize!**

Please RSVP to Colleen Hickey at the LCBP office...we need to order enough appetizers! [Chickey@lcbp.org](mailto:Chickey@lcbp.org) or call (802) 372-3213 ext 11. Please bring a friend or colleague
