Lake Champlain Basin Program

ake Champlain is a vital lake with many assets. But like many of North America's great waters, it has environmental and cultural resource management issues.

Lake Champlain is fortunate, however. Citizens from throughout its drainage basin have united to create a vision for its future and to make that vision a reality.

Many people and programs are working for Lake Champlain. Left to right: restoring streambanks; building osprey platforms; and managing nuisance species like Eurasian watermilfoil.

One Lake - One Basin - One Future

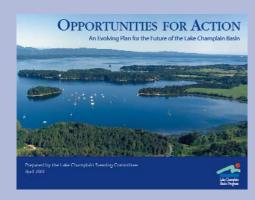

Lake Champlain Basin Program

About the Program

The Lake Champlain Basin Program (LCBP) was created by the Lake Champlain Special Designation Act of 1990. Our mission is implementing the Lake Champlain management plan, *Opportunities for Action*. Program partners include New York, Vermont, and Québec, the US Environmental Protection Agency and other federal agencies, and local government leaders, businesses, and citizen groups.

What Are The Plan's Goals?

- ☐ Improving water quality throughout the Lake Champlain Basin.
- □ Protecting the Basin's living natural resources.
- □ Preserving and enhancing the region's rich cultural and recreation resources and economic health.

The Lake Champlain Steering Committee leads the LCBP. Its members include many of the program partners, and the chairpersons of technical, cultural heritage and recreation, education, and citizen advisory committees.

The LCBP receives annual US Federal appropriations. Many sources fund Plan actions including federal, state, and provincial agencies, and contributions from local communities, businesses, and individuals.

Understanding Your Lake

Sound science and long-term monitoring are the foundation for Lake Champlain's management plan. More than fifty research projects have been funded by the LCBP, especially on the high priority issues of reducing phosphorus, preventing pollution from toxic substances, managing nonnative aquatic nuisance species, and protecting human health.

Research examples include lake sediment studies (above) and understanding sea lamprey, which prey on sport-fish (left).

Local Connections and Opportunities

Cleaning up streams, increasing Lake access, helping homeowners prevent pollution, and revitalizing cultural sites—these are just a few of the community projects awarded LCBP local grants. More than \$2.8 million has been granted since 1993 (as of 2005). The LCBP also relies on citizen input from public meetings, written comments, and through the Citizens Advisory Committees.

LCBP Local Grants by County Each dot shows **Grant Amount** local progress! > \$15,000 Learn about more than 570 \$3,000-\$15,000 LCBP-funded · < \$3,000 projects at www.lcbp.org.

Bringing the Lake to You!

Outreach programs include educator training, school programs, local media partnerships, publications, and newsletters. Visit the Lake Champlain Resource Room in ECHO at the Leahy Center for Lake Champlain in Burlington for interactive exhibits and our Lake library. Learn lots more online at www.lcbp.org.
