

Hi everyone! The agricultural community is working hard to provide opportunities for interested Vermonters to see the work we are doing on our farms to protect and improve water quality. I would invite and encourage folks that are attending the meeting Monday to take a few minutes and view at least the first two videos below. These two were produced by the famers in the three VT watershed groups. Protecting the soil has a simulation of how rain events affect the amount of runoff on fields using different practices. I promise, it is much more exciting than it sounds. Thank you for inviting me and I look forward to seeing you all virtually Monday afternoon.
